

Corporate Fact Sheet

Vision

LDR has a passion for innovation to improve spine care.

Mission

LDR Holding Corporation is a global medical device company focused on designing and commercializing novel and proprietary surgical technologies for the treatment of patients suffering from spine disorders. LDR's primary products are based on its exclusive VerteBRIDGE® fusion and Mobi® non-fusion technology platforms and are designed for applications in the cervical and lumbar spine. These technologies enable products that are less invasive, provide greater intra-operative flexibility, offer simplified surgical techniques and promote improved clinical outcomes for patients as compared to existing alternatives.

LDR received approval from the U.S. Food and Drug Administration (FDA) in August 2013 for the Mobi-C® Cervical Disc, the first and only cervical disc replacement device to receive FDA approval to treat both one-level and two-level cervical disc disease. For more information regarding LDR Holding and the Mobi-C Cervical Disc, visit www.ldr.com or www.cervicaldisc.com.

Founded

2001- LDR Medical, SAS
